

## ADVANTAGES

- Combines highest removal efficiency and lowest pressure drop
- Predicted removal efficiency and lifetime by Camfil's proprietary software
- Typical target gases: hydrogen sulfide, VOCs, ozone, formaldehyde, nitrogen dioxide, and other acids and bases
- Corrosion resistant and low dusting construction
- 25% lighter than CamCarb CM
- Inherently leak-free design when installed in dedicated hardware

## Application

The most reliable molecular filter for high efficiency and long-term control of molecular contaminants in sensitive buildings and process industries.

Filter may also be used in odor removal applications in pulp and paper mills and wastewater treatment plants, or in lighter applications such as airports, cultural heritage buildings, and commercial offices.

<b>Frame</b>	ABS
<b>Gasket</b>	Double seal, molded TPE
<b>Media</b>	Activated Carbon; Impregnated Activated Carbon; Impregnated Activated Alumina
<b>Max Temperature (°C)</b>	60
<b>Min Temperature (°C)</b>	-21
<b>Installation Options</b>	Front access frames and side access housings are available. See related products below.  Sixteen (16) cylinders are applied per 24" x 24" (610 x 610mm) opening. Maximum face velocity: 500 fpm (2.5 m/s) per opening or 31 fpm (.16 m/s) per CG3500 cylinder. Can be filled with any loose-fill molecular media.
<b>Comment</b>	Filter performance will be affected if used in conditions where T and RH are above or below the optimum conditions. #1 - Other models with different media options are available. High-performance media will be selected in accordance to the type of application. #2 - Pressure drop at maximum rated airflow. #3 - Filled with UL approved media

Type	Length (mm)	Diameter (mm)	Airflow/pressure drop (m³/h/Pa)	Optimum temperature (°C)	Optimum RH (%)	Nominal weight (kg)
